To: Parents of NTX Future City Junior Competitors
Re: NTX Future City® Junior Competition 2022-23

Your student has the opportunity to participate in the North Texas Regional Future City® Junior Competition. Future City is a national program sponsored by the engineering community to promote technological literacy and engineering to middle school students. Our goal is to interest young people in the math, technology and scientific studies needed to develop the engineers of the future. NTX Future City Junior serves as an introduction to engineering and technology for 4-5th grade students.

Because the project involves *lots* of volunteer-engineer mentors and *lots* of parent/community volunteers – in addition to lots of fun and hard work – it is important for both students and parents to understand the project requirements:

1. Students participate as a team consisting of three students, an educator, and a volunteer-engineer mentor representing their group/organization.
2. The goal is to solve a problem for a city of the future. The steps involved include:
 - a. Developing a concept for a livable city of the future
 - b. Writing an essay on an engineering topic – this year: “Climate Change”
 - c. Constructing a 3-D scale model of a section of their city
 - d. And, finally, demonstrating their model and design to the judges.

Teams receive awards for their work to include plaques and certificates.

Timeline

After two years of virtual competitions, we are back to our in-person event - this year at Tarrant County College in downtown Fort Worth.

- Oct-Nov Work on the city concept
- Oct-Nov Research and write the essay
- Nov-Jan Build the 3-D scale model using recycled materials
- Late Jan Demonstrate model to judges at TCC-TR
N TX Regional Competition Awards Ceremony

We hope that you will support the students and us as they explore the future and learn how engineers turn ideas into reality with the Future City program.
